

Product Specification

Small Batch Sieving

E-400 Range

A modular check sieve with a sack tip or grading configuration.

The Sievmaster E-400 is comprised of a modular sieve stack built on a mobile frame; each stack is designed to be flexible enough to suit requirements such as grading and/or sack tipping.

Primarily aimed at the food, chemicals, and artisan markets, these mobile units can be adapted to meet requirements as they change, or fit different points in a process.

Their modular design means they can be easily adapted by the user for check screening, grade sieving (E-400-GRV), or low volume sack tipping (E-400-STV).

Features & Benefits

- The unit can utilise the STV components to become a sack tipping unit or GRV components to become a grading unit with no other modifications
- Sieve directly into tote bins, drums, or bags
- Bag cut out and internal sack rest grid (STV components)
- Conforms to CE, UKCA, FDA, EC 1935/2004 regulations
- Dust and waterproof to at least IP65
- No tool, quick change screens
- Wet or dry applications
- All stainless steel contact parts
- Mobile support frame
- Easy-Clean design, no crevices
- Low maintenance/running costs – tool free disassembly & minimal servicing

Product Options*

Ultrasonic upgrade - eliminates mesh blinding.

Addition of underscreen magnet assy - 12,000 gauss.

Continuous processing of 2 fractions - Oversize / fines.

Mesh debinding - Mechanical.

Continuous processing of 3 fractions - Oversize / cut 1 / fines.

Upgrade to ATEX II 3D internal & external

*More options available on request

Typical Materials

- Most food, beverage, chemical powders and granular products

Finishes available

- Internal surfaces dull polish to <0.8 Ra
